**NOTICE OF PUBLIC COMMENT PERIOD REGARDING AN APPLICATION FOR
A PERMIT TO CONSTRUCT AND A TIER II PERMIT TO OPERATE
AN AIR POLLUTION-EMITTING SOURCE**

PROPOSED ACTION: Flexcel, Post Falls, Idaho applied to the Department of Environmental Quality (DEQ) for a permit to construct and Tier II permit to operate an air pollution-emitting source located at 1881 Seltice Way, Post Falls. DEQ has determined that operation according to the proposed permit will not cause or significantly contribute to a violation of any ambient air quality standard and will not injure or unreasonably affect human or animal life or vegetation. DEQ has reviewed the application and completed an analysis of the information submitted by the applicant to replace six paint spray booths with four powder coating booths, and also to remove formaldehyde emissions limits from their existing PTC No.055-00038 as the paint containing this chemical is no longer in use at the plant. Based on this analysis, DEQ proposes to issue the permit to construct and Tier II operating permit to Flexcel, Post Falls.

PUBLIC COMMENT PERIOD: Notice is given that the DEQ has scheduled a period to receive public comments under Docket No. AQ - 0626 concerning the air quality aspects of the project application and the proposed permit in accordance with IDAPA 58.01.01.209 and 404. A package containing the information submitted by the applicant, DEQ's analysis, and the proposed permit is available for public review at the following locations:
